

Mathieu Matar

Computer Science senior student with strong foundations in object-oriented programming, data structures, and backend development. Hands-on experience delivering production software for real clients, with a strong ability to translate functional specifications into clean technical solutions. Eager to learn, quality-driven, very curious, and comfortable working in agile, team-based environments.

Education

Bachelor of Science in Computer Science

University of Balamand, Lebanon
Fall 2023 – June 2026 (Expected)
GPA: 82%

French Baccalaureate

Collège Mariste Notre Dame de Lourdes Jbeil – AEFE
2023

Work Experience

Web Developer, Vibrand Studio

June 2024 - Present

- Designed, developed, and maintained production websites and web applications.
- Translated functional and business requirements into technical designs and implementations.
- Collaborated with designers, developers, and clients in a team environment.
- Delivered and maintained real-world projects, including:
 - vibrandstudio.com
 - bkerki.org
 - alyasavillage.com
 - lightpopcrispy.com
 - sistersofthecross.org.lb
- Worked directly with non-technical stakeholders, explaining technical decisions clearly.

Projects & Competitions

- **LCPC 2025:** Participated in a three-person team in the Lebanese Collegiate Programming Competition, solving complex algorithmic challenges under time constraints.
- **Academic Team Collaborations:** Partnered with student peers on multiple course-integrated projects in C++ and Java, with a primary focus on code efficiency, memory management, and software architecture.
- **Personal Engineering Projects:** Developed various independent applications, including Android-based tools that utilize low-level hardware interaction for haptic-based communication.
- **Technical Portfolio:** Full source code and implementation details for all academic and personal work are hosted on my GitHub.

Skills

Programming Languages

- Java (OOP, Spring Boot)
- C++ (OOP, advanced data structures)
- JavaScript
- PHP
- SQL

Backend & APIs

- Node.js
- Express.js
- NestJS
- APIs (Rest / GraphQL)
- Prisma
- Sequelize

Frontend & Web

- React
- HTML5
- CSS3
- JavaScript (ES6+)
- WordPress

Tools & Development Environment

- Git / GitHub
- VS Code
- IntelliJ IDEA
- NetBeans
- Postman

Core Concepts

- Object-Oriented Programming (OOP)
- Data Structures & Algorithms
- Software Design & Architecture
- REST & GraphQL APIs
- MVC pattern
- Problem solving & analytical thinking

Languages

- English (Fluent)
- Arabic (Native)
- French (Fluent)
